## Objective

Multi-faceted English/Spanish software developer driven by customer satisfaction. Committed to effective problem-solving through communication & peer mentorship. Looking for a challenging role where I can engage in meaningful collaboration towards collective success.

## Experience

April 2022 - August 2023

### **Golden State Assembly, Fremont CA – IT System Administrator**

- Ticket management of 50+ employees for network, hardware and O365 issues.
- Streamlined manual workflows with software & script automation solutions.
- Configured deployment pipelines for production app environments.
- Administered on-prem vSphere infrastructure for developers.
- Migrated business data to a highly-available storage area network.
- Established failover contingency plans for server and data restore operations.

## Skills

- Provisioning distributed systems in multi-cloud environments (ESXi, Hyper-V, AWS)
- Document network layouts, system design architectures and app guides.
- Linux administration & remote access protocols (SSH, SMB, SFTP, iSCSI, etc..)
- Bash & Python scripting for workflow and task automations.
- Deliver intuitive web user interfaces with React and Vue3.
- Leading tech projects for ambiguous business problems.

## Certifications

**AWS CLF-Co2**

## Education
