Objective

Multi-faceted English/Spanish software developer driven by customer satisfaction. Committed to effective problem-solving through communication & peer mentorship. Looking for a challenging role where I can engage in meaningful collaboration towards collective success.

Experience

April 2022 - August 2023

Golden State Assembly, Fremont CA – IT Specialist

- Ticket management of 50+ employees for network, hardware and O365 issues.
- Conducted company-wide security awareness training for email phishing.
- Streamlined manual workflows with software & script automation solutions.
- Configured deployment pipelines for developer and production environments.
- Rack servers, routers and switches. Administered vSphere infrastructure.
- Migrated data to a 10gigabit storage area network for reliable file sharing.
- Established failover contingency plans for server and data restore operations.

Skills

- Provisioning distributed systems in VMware ESXi, Microsoft Hyper-V and AWS.
- Document network layouts, system design architectures and app guides.
- Linux administration & remote access network protocols (SSH, SFTP, etc..).
- Bash and Python scripting for IoT devices and task automations.
- Gather requirements and technical specs for software app design.
- Deliver intuitive web user interfaces with React and Vue3.
- Leading tech projects for ambiguous business problems.
