Objective

Bilingual software developer and problem-solver with an eye for customer satisfaction. Committed to effective communication and peer mentorship. Looking for a challenging role where I can expand my expertise and engage in meaningful collaboration towards collective success.

Skills

- Leverage React and TypeScript to deliver intuitive UI for customer products.
- Aggregate backend data to present visual reports on the frontend.
- Leading tech projects for ambiguous business problems with few pointers.
- Building HTML/CSS/JS websites with external API calls.
- Provisioning infrastructure in VMware ESXi, Microsoft Hyper-V and AWS.
- Containerize monolith apps into microservices with Docker Engine.
- Comfortable with headless Linux distros & remote access network protocols.

Experience

April 2022 - August 2023

Golden State Assembly, Fremont CA - IT Specialist

- Ticket management of 80+ employees for network, hardware and M365 issues.
- Handled Azure DevOps automations for developer and production environments.
- Improved traceability of harness rejects by adding digital tracking modules to PHP site.
- Lead development of customer-facing website for generating excel reports of work orders.
- Rack & stack Cisco routers and switches. Administered Layer 2 security.
- Improved Windows Server storage reliability with an iSCSI SAN and DRBD redundancy.
- Established failover contingency plans for on-prem server and data restore.

Education

Chabot College, Hayward CA

Computer science major. Object-oriented programming with C++

Mt. Eden High School, Hayward CA

AP Computer Science; Created JavaScript mobile apps, studied TCP/IP networking.
